WORK EXPERIENCE

Web Developer

Compact Studio

Piata 1 Mai nr 1 -2, 400141 Cluj-Napoca (Romania)

www.compactstudio.ro

I am currently working as a full-stack web developer using a range of technologies for web, application design and application development. My individual projects were mostly based on WordPress, HTML, CSS, Javascript, jQuery, Bootstrap and PHP scripting language for server side integration.

During this time, I learned to manage my work hours and maintain direct communication with the clients. I received feedback on my work and I've rebuilt the parts that were not in line with the client needs.

I've become more organized, learned to work with Jira Agile and github for our projects commits.
